

eternalHealth
Your forever partner in healthcare.

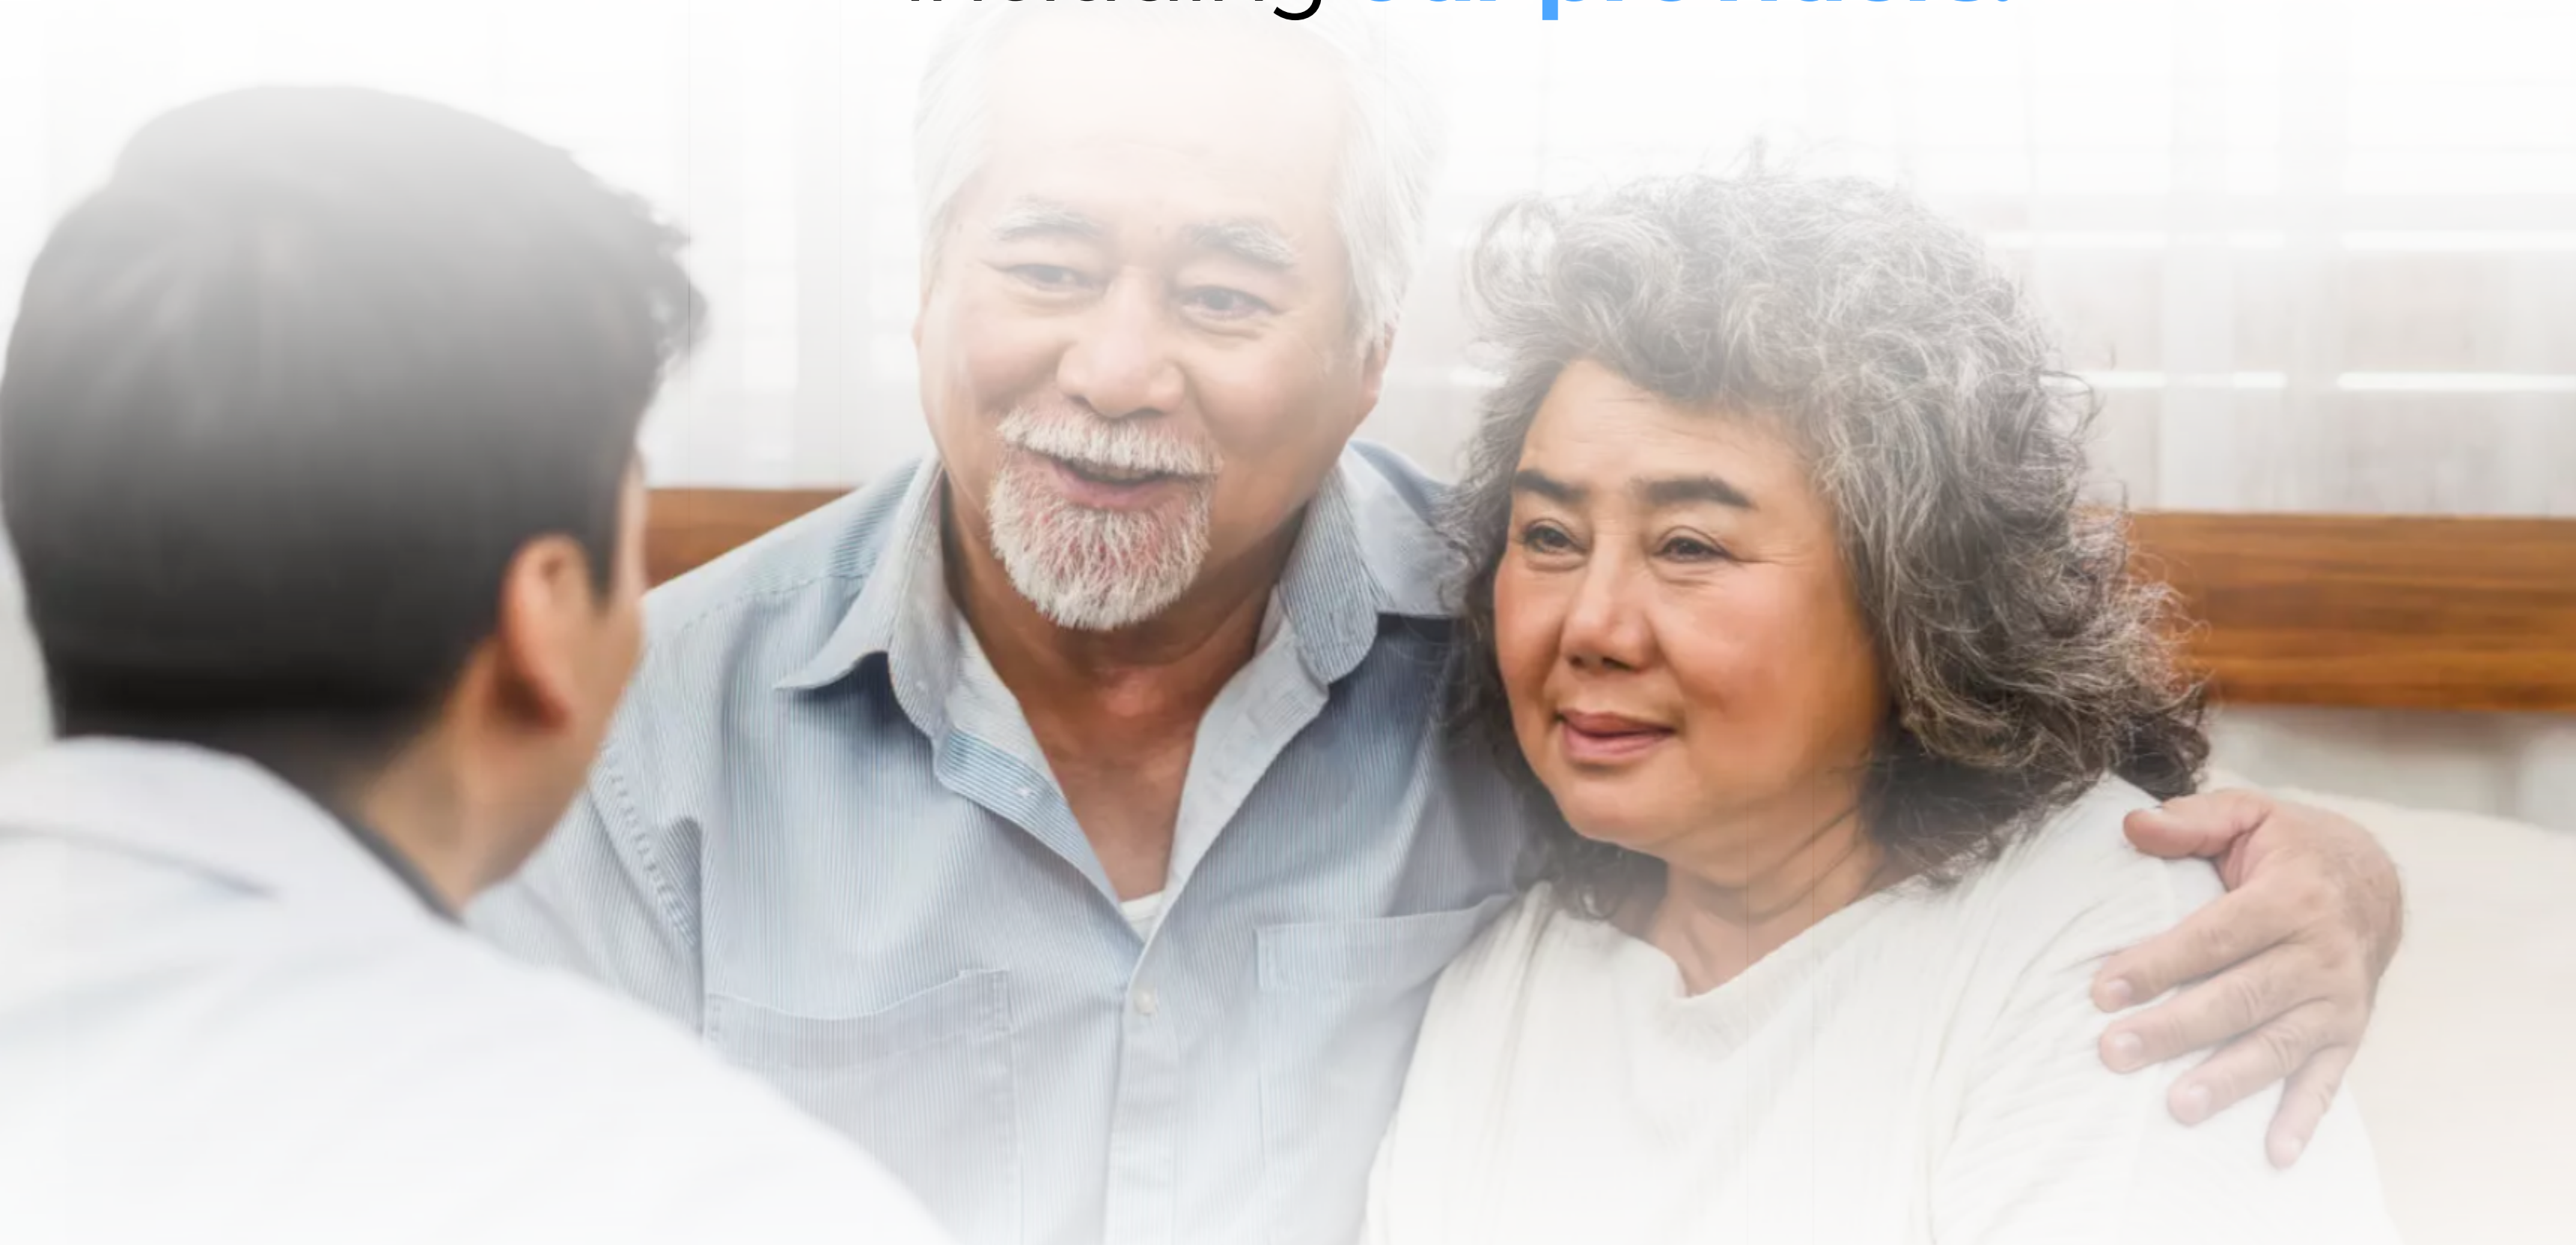

We're your local Massachusetts plan. Here's how we can work together to improve the quality of care.

Join our team today, call (617) - 665 - 7430

As a sustainable health insurance company, we are committed to establishing long-term, transparent, and data-driven relationships with all the key stakeholders in the care continuum, including **our providers.**

At eternalHealth we know the value that providers bring, and so we've engaged with providers to understand your pain points and have actively worked to alleviate them.

How? It's simple, we provide you with the right tools.

Read more

eternalHealth operates on a cloud-based platform that embraces robotic process automation (RPA), machine learning (ML), and artificial intelligence (AI).

Our platform offers a 360-degree view of patient care history and opportunities to improve **cost and quality** at every encounter, providing you with actionable intelligence, and **integrating into your existing workflows**, such as your EMR.

Optimizing our internal processes allows us to invest further in providing actual medical care for our members and ultimately establishing risk-based incentives with you.

Let us help reduce your administrative burden and excessive paperwork, so you can focus on what is most important:

providing high-quality care to your patients.

For our providers, interactions with eternalHealth are automated and can be easily **integrated directly into existing workflows** – eliminating waste and ensuring efficient payment processes.

To achieve our goals with you, we have paid close attention to common provider burdens and struggles.

From a streamlined credentialing process, to our fully automated approach to the prior authorization process, our goal is to give you time back.

Instead of waiting on the phone or dealing with endless paperwork, you can spend time doing what you're best at: **making a positive impact on people's lives and health.**

Our mission at eternalHealth is to provide **affordable, high-quality care** to our members, while prioritizing preventative and chronic care management.

Proudly a local Massachusetts company, we are financially committed to building brand equity in our **local communities**. Our local, targeted strategy will engage our members, increase enrollment and retention, and ultimately **improve outcomes**.

Member benefits will be specially designed for the diverse needs of our members and their communities.

Benefits that our members actually want and need.

eternalHealth will be **woman-owned, run, and built.**

Over 50% of our work force, board of directors, and investors will be women.

Women make 80% of healthcare decisions for themselves and their families, therefore our commitment will allow us to **increase engagement** with our members, and ultimately aid providers in improving clinical outcomes.

We are committed to making comprehensive healthcare decisions, **for both men and women.**

We make you a priority, so you can put your patients first.
